Contents Volume 208 (1999)

Earthworm responses to plant species' loss and elevated CO_2 in calcareous grassland
J.G. Zaller and J.A. Arnone III **1–8**

Nutrient uptake and growth of barley as affected by soil compaction
J. Arvidsson **9–19**

Nitrogen mineralization and crop uptake of N from decomposing ^{15}N labelled red clover and yellow sweetclover plant fractions of different age
M. Wivstad **21–31**

Exploitation of K near roots of cotton, maize, upland rice, and soybean grown in an Ultisol
L.D. Hylander, N. Ae, T. Hatta and M. Sugiyama **33–41**

Nitrogen uptake by crops, soil distribution and recovery of urea-N in a sorghum–wheat rotation in different soils under Mediterranean conditions
P. Nannipieri, L. Falchini, L. Landi, A. Benedetti, S. Canali, F. Tittarelli, D. Ferri, G. Convertini, L. Badalucco, S. Grego, L. Vittori-Antisari, M. Raglione and D. Barraclough **43–56**

Axial Water Flux Dynamics in Small Diameter Roots of a Fast Growing Tropical Tree
R.S. Senock and C. Leuschner **57–71**

Leaching requirement conceptual models for reactive salt
A.H. Alsaeedi and A.M. Elprince **73–86**

EDTA and Pb–EDTA accumulation in *Brassica juncea* grown in Pb–amended soil
A.L. Epstein, C.D. Gussman, M.J. Blaylock, U. Yermiyahu, J.W. Huang, Y. Kapulnik and C.S. Orser **87–94**

Effect of ammonium or nitrate nutrition on net photosynthesis, growth, and activity of the enzymes nitrate reductase and glutamine synthetase in blueberry, raspberry and strawberry
W. Claussen and F. Lenz **95–102**

Root development of the Zinc-hyperaccumulator plant *Thlaspi caerulescens* as affected by metal origin, content and localization in soil
C. Schwartz, J.L. Morel, S. Saumier, S.N. Whiting and A.J.M. Baker **103–115**

The effect of soil nutrient availability on retranslocation of Ca, Mg and K from senescing sapwood in Atlantic white cedar
J.A. Andrews, T.G. Siccama, K.A. Vogt **117–123**

Efficiency of nitrate uptake in spinach: impact of external nitrate concentration and relative growth rate on nitrate influx and efflux
M.W. Ter Steege, I. Stulen, P.K. Wiersema, F. Posthumus and W. Vaalburg **125–134**

Growth and mineral nutrition of the native trees *Pollalesta discolor* and the N-fixing *Inga densiflora* in relation to the soil properties of a degraded volcanic soil of the Ecuadorian Amazon
R. Davidson, D. Gagnon and Y. Mauffette **135–147**

Drought adaptation of field grown wheat in relation to soil physical conditions
M. Ali, C.R. Jensen, V.O. Mogensen and A. Bahrun **149–159**

Absorption of molecular urea by rice under flooded and non-flooded soil conditions
A.N. Safeena, P.A. Wahid, P.V. Balachandran and M.S. Sachdev **161–166**

Morphological observations of dye tracer infiltration and by-pass flow in milled peat
S.J. Mooney, N.M. Holden, S.M. Ward and J.F. Collins **167–178**

Water relations and root activities of *Buchloe dactyloides* and *Zoysia japonica* in response to localized soil drying
B. Huang **179–186**

Microbial transformations of C and N in a boreal forest floor as affected by temperature
P.S.J. Verburg, D. Van Dam, M.M. Hefting and A. Tietema **187–197**

Effect of byproduct, nitrogen fertilizer, and zeolite on phosphate rock dissolution and extractable phosphorus in acid soil
Z.L. He, V.C. Baligar, D.C. Martens, K.D. Ritchey and M. Elrashidi **199–207**

Phosphorus supply and arbuscular mycorrhizas increase growth and net gas exchange responses of two *Citrus* spp. grown at elevated [CO_2]
J.P. Syvertsen and J.H. Graham **209–219**

Alleviation of nickel toxicity by ammonium supply to sunflower plants
P. Zornoza, S. Robles and N. Martin **221–226**

Short-term mineralization of maize residues in soils as determined by carbon-13 natural abundance
B.C. Liang, E.G. Gregorich and A.F. MacKenzie **227–232**

Factors controlling equilibrium boron (B) concentration in nutrient solution buffered with B-specific resin (Amberlite IRA-743)
L. Huang, R.W. Bell and B. Dell **233–241**

Effects of nutrient solution zinc activity on net uptake, translocation, and root export of cadmium and zinc by separated sections of intact durum wheat (*Triticum turgidum* L. var *durum*) seedling roots
R.M. Welch, J.J. Hart, W.A. Norvell, L.A. Sullivan and L.V. Kochian **243–250**

Response of *Eucalyptus camaldulensis* Dehnh., *E. globulus* Labill. ssp. *globulus* and *E. grandis* W.Hill to excess boron and sodium chloride
N.E. Marcar, J. Guo and D.F. Crawford **251–257**

A comparison of direct and indirect ^{15}N isotope techniques for estimating crop N uptake from organic residues
R.C. Hood, K. N'Goran, M. Aigner and G. Hardarson **259–270**

Litter dynamics of low and high tannin sericea lespedeza plants under field conditions
K.L. Kalburtji, J.A. Mosjidis and A.P. Mamolos **271–281**

The role of soil conditions in fine root ecomorphology in Norway spruce (*Picea abies* (L.) Karst.)
I. Ostonen, K. Lõhmus and R. Lasn **283–292**

Dinitrogen fixation in white clover grown in pure stand and mixture with ryegrass estimated by the immobilized ^{15}N isotope dilution method
F.V. Jørgensen, E.S. Jensen and J.K. Schjoerring **293–305**

Denitrification in the vadose zone and in surficial groundwater of a sandy entisol with citrus production
S. Paramasivam, A.K. Alva, O. Prakash and S.L. Cui **307–319**

Volume contents **321–323**

Author index **324**

Instructions for authors **325–330**
